

PROTECTING DoD FROM INSIDER THREATS

PRIVILEGED ACCESS MANAGEMENT FOR DEPARTMENT OF DEFENSE

OUR SOLUTION

Discover, manage and constantly watch privileged user accounts across networks, systems, and devices.

- Automate management controls for service accounts across the enterprise.
- Constantly monitor privileged user behaviors and identify abnormal actions.
- Desktop application controls to prevent unacceptable application usage
- Stops exploits such as malware and ransomware at the endpoint.

HELPING DoD ORGANIZATIONS PREVENT INSIDER THREAT

Session Control – prevent/record/replay and monitor active sessions within critical infrastructure.

- Track password use with audit reports and active alerts showing access and requested access for every privileged account.
- Provide controls and oversight on usage of privileged accounts without affecting key mission requirements and timelines.
- Protect networks from stray trusted and privileged users inside the network and compromised accounts.
- Automate password change policies enterprise wide to meet best practices.
